Reference No. Recycling markets acceleration fund/jk-4-22

Date: 27/04/2022

Dear member

Sustainability Victoria has launched a \$5 million Recycling Victoria Markets Acceleration Fund targeted at Victorian businesses, research institutes and industry to develop and commercialise new uses for recycled materials such as end of life tyres.

Grants of between \$30,000 and \$400,000 are available for projects that identify and develop new uses for recyclable materials in Victoria including the manufacture of innovative products and processes with recycled materials that improve confidence in and demand for recycled products.

The fund is designed to directly address materials subject to the national waste export bans such as plastics, tyres and glass but will also support solutions for other emerging materials streams such as e-waste.

To learn more, about the Recycling Victoria Markets Acceleration Fund visit the Sustainability Victoria portal by clicking [here](#).

Applications are open and will close at 11:59 pm on Thursday, 2 June 2022.

Applicants are required to contribute \$1 for every \$1 funded by the Victorian Government.

There is an information session scheduled which will provide further details on eligibility, how to apply, and general overview of the fund and its objectives.

You can register for this by clicking on the link below.

An [information session for Stream 1](#) will be held on Monday, 9 May from 10 am to 11:30 am.

The fund is part of a \$30.46 million Markets Acceleration Package delivered under the Government's Recycling Victoria Policy, in partnership with the Environment Protection Authority and the Department of Environment, Land, Water and Planning.
