VACC Delivers e-Roadworthy for the Victorian Automotive Industry

Dear member

As you are aware, the VicRoads roadworthy e-Certificate trial was launched in December 2018 with 55 participants. To date there have been well over 55,000 certificates issued through the system.

VACC has been advocating for over 12 years for the introduction of an online roadworthy system that delivers much need efficiencies for consumers, License Vehicle Testers (LVT's), Licensed Motor Car Traders (LMCT's) and VicRoads. This new system facilitates increased level of regulatory compliance, important data gathering and improves the security and safety of the broader vehicle fleet in Victoria. It also reduces the red tape for consumers, LVT's and enhanced end to end business efficiencies for LMCT's when retailing a vehicle. Efficiencies created for LVT's and LMCT's is always a good thing.

Over the past few years, VACC through its LVT industry focus group have been working collaboratively with VicRoads ensuring the system is fit for purpose along with embarking on an education campaign by hosting member briefings across metro and regional Victoria.

While an official launch decision is awaiting a formal ministerial announcement, VicRoads have advised that they have Ministerial approval to extend the program to all LVT's who wish to participate in the trial. VACC thanks the Minister, the Hon Jaala Pulford MP for giving the green light on the rollout to continue without interruption during the COVID-19 pandemic.

VACC encourages members who would like to participate in the program to contact VicRoads on 1300 309 571 or by replying to this bulletin.

Finally, I encourage anyone wanting to join the VACC LVT focus group and contribute to discussions for fairer and more sustainable conditions to contact me, the more diverse the better.
