

Member feedback sought on Vehicle Standards Bulletin (VSB) 6 – Section J Review

Dear Members

The National Heavy Vehicle Regulator (NHVR) is reviewing Section J, Code J4 – Tipper Bodies. They are seeking input and feedback from the broader heavy vehicle industry, including vehicle modifiers and approved vehicle examiners (AVEs) who use Section J.

A public consultation draft of the Modification of Code J4 is available for review and can be accessed [HERE](#).

It includes:

- The [draft VSB6 Modification Code J4](#)
- [Draft J4 checklist – Tipper Bodies](#)

May I request feedback to be sent to myself, Imogen Reid, ireid@vacc.com.au by no later than Friday, 8 October so a submission detailing each members concerns may be compiled and submitted by the due date. The NHVR is specifically seeking technical content and feedback on the 'usability' of the Code.

Should you have any further questions, please do not hesitate to contact me on the above email or 0428 334 128.

Dr Imogen Reid
