Chain of Responsibility (CoR) Gap Assessment Tool

Dear Members

The National Heavy Vehicle Regulator (NHVR) has launched a Chain of Responsibility (CoR) Gap Assessment Tool to assist participants in the supply chain identify, assess and manage risks and obligations.

The tool takes you through a series of practical questions, enabling you to examine your business practices and system controls against known risks and recognised best practice.

It will also help you understand your role(s) within CoR and assist you to identify compliance and safety gaps, (across the entire supply chain or specific job role).

Members can access the dashboard to save reports and generate recommendations as a PDF checklist based on the questions you answered.

The assessment will take between 5 and 15 minutes to complete depending on your responses. Every person or company who is a party in the supply chain can benefit from the review of their business using the guided questions in the CoR Gap Assessment Tool.

It is recommended that once you have completed the online assessment, you take time to go through the CoR Quick Briefs and review the material in Safety Management Systems on how you can manage your safety gaps.

For more information or guidance, visit the NHVR website [HERE](#).
