

### Freight PASS, the NHVR's new interactive tool to improve industry decision-making

Dear member

The National Heavy Vehicle Regulator has launched its Freight PASS – designed to help industry make more informed safety, productivity and sustainability decisions about the benefits of heavy vehicle combinations on the road network.

The platform allows the user to input scenario data including the type of vehicle, trip length, average speed and commodity to estimate time, crash rate, fuel consumption, carbon emissions, and estimate costs or savings from longer or shorter routes.

The platform is now open for consultation and feedback.

The project team is hosting a number of webinars, which will provide an overview of:

- why and how Freight PASS was developed
- detail on the selection of source material
- the consultation process and next steps.

The webinars also contain a Q&A component with the project team.

To register, please select a date and time from the links below and fill in your details as directed.

- [Webinar 1: Monday 27 November: 10 – 11am \(AEST\)](#)
- [Webinar 2: Wednesday 29 November: 1 – 2 pm \(AEST\)](#)
- [Webinar 3: Monday 11 December: 10 – 11am \(AEST\)](#)
- [Webinar 4: Wednesday 13 December: 1 – 2 pm \(AEST\)](#)

Members can find out more about Freight PASS and access consultation materials [HERE](#)
