NHVIM Fact Sheet Brake Testing

VACC members are reminded that from 1 July 2016 the National Heavy Vehicle Inspection Manual (NHVIM) Version 2.1 will be the national standard for heavy vehicle inspections in all participating jurisdictions.

In an effort to make participants as familiar as possible with the mandated requirements under the standard, VACC provides you with the following link to the [NHVIM Fact Sheet – Brake testing](#).

The National Heavy Vehicle Regulator has advised VACC that the fact sheet will provide clarification on the braking requirements in *Section 2 Brakes* of the NHVIM Version 2.1.

We urge you to make all relevant staff within your businesses aware of the NHVIM Fact Sheet.

Regards
