

## **Seeking expression of interest from a tool chest air brush artist to promote classic car restorations and car clubs**

The Victorian Automotive Chamber of Commerce (VACC) is currently in discussion with a car club that wishes to promote the restoration of cars and the engagement of young people in classic car clubs.

One of the initiatives that has been raised is for the car club to donate a customised tool chest to a young aspiring body repairer or mechanic/auto electrician. The tool chest would have air brush artwork depicting classic cars and promoting the car club at the same time. This initiative is a great idea and credit to the car club who want to engage young Australians in the industry.

We are seeking a VACC member who specialises in vehicle body graphics/air brush work who may be interested, for a fee, in creating the artwork for the tool chest.

If you are interested, please email your details by Thursday, 27 April 2023 to [kzdravevski@vacc.com.au](mailto:kzdravevski@vacc.com.au)

We look forward to hearing from you soon.
