### FCAI 5 Star ATV safe user guide

Following WorkSafe Victoria's intention to recommend fitment of ATV Operator Protection Devices (OPDs) and Manufacturers stance against OPDs the Manufacturers Group (FCAI) have produced the attached 5 Star ATV Safe User Guide.

The rationale was to simplify the industry's previous longer 'know safety practices' guidelines, but also to assist ATV dealers to better inform their customers of safe practice, particularly when it comes to selecting the most appropriate vehicle.

The FCAI member companies believe this 5 Star ATV Safe User Guide simplifies the safety message, involves the dealers at the crucial vehicle selection time, and concentrates on the Known Safety Practices which can improve outcomes.

Yours sincerely
