Standards Australia

Members are advised of the following draft standards open for commenting on Standards Australia public comments system.

DR AS/NZS 1754:2023 Child restraint systems for use in motor vehicle

This standard specifies requirements for restraining devices for child occupants of passenger cars and their derivatives, such devices being intended, when properly selected, correctly installed and correctly adjusted, to reduce the risk of bodily injury in a vehicle impact. The devices may also have application to other types of vehicles.
